

Outcomes of Restoration Committee

February 21, 2019

PROCESS

1. Committee desires to be a “working” committee, rather than an “input” committee
2. Committee will meet once a month

PROGRAM

1. Committee will be developing an annual work plan over the coming months
2. TRWC is not inclined to develop new on-the-ground restoration projects in the near term, but rather spend the next year conducting restoration planning, partner coordination, and prioritizing actions
3. Scott and Kellyn will continue to revise and refine a partner gap-analysis
4. Kellyn and Stephen will check in with their respective agencies to determine what GIS information can be shared with TRWC
5. Scott will initiate having ArcMap 10x installed on the TRWC computer
6. Dr. Lee Bendo from Terrain Works will be presenting NetMap as a restoration prioritization tool at the next Restoration Committee meeting; March 20th.

PROJECTS

1. Committee recommended language changes for our EF Dairy Creek permits
2. TRWC will contract with an outside consultant for EF Dairy Creek permitting
3. TRWC will manage the remainder of the project work
